📍 Abu Dhabi, UAE

EDUCATION

BS – Electronics Engineering

New Era University

2018 – 2022

GWA: 1.76

PROGRAMMING LANGUAGES:

- HTML
- CSS
- JavaScript
- C#
- ASP.NET
- PHP

Libraries / Frameworks:

- React
- Angular
- Next.js
- TailwindCSS

Tools / Platforms:

- Git
- VS Code
- Jira
- Unix/Linux
- Jenkins

Databases:

- SQL
- MySQL
- Snowflake
- MongoDB

PROFILE

A highly motivated IT professional with experience in full-stack development, automation, and system support. Strong problem-solver with a focus on performance, reliability, and delivering efficient technical solutions.

WORK EXPERIENCE

Richmindale

September 2025 – Present

Full-Stack Developer

- Develop and maintain full-stack web applications using JavaScript, TypeScript, Angular/React, Node.js, PHP, and MySQL
- Build responsive, high-performance user interfaces and implement RESTful APIs for seamless front-end and back-end integration
- Manage databases, optimize queries, and ensure scalable, efficient system architecture
- Deploy applications on cloud platforms (AWS, Azure, Vercel) while utilizing Git/GitHub and agile methodologies for smooth CI/CD and project delivery

Simon Data

November 2024 – September 2025

Incident Analyst

- Investigate build failures and application issues, identifying root causes and logging incidents as needed. Regularly check Jenkins build pipelines to ensure successful deployments and identify failed builds.
- Collaborate with engineering to relay critical incident findings and ensure timely bug resolutions.
- Coordinate with client-facing teams to ensure that bugs affecting customers are addressed promptly and effectively.
- Ensure knowledge sharing through proper documentation and updates to internal knowledge bases.

Yondu

September 2022 – August 2024

Application Support Specialist

- Proficient in Unix/Linux shell scripting and skilled in writing complex MySQL, PostgreSQL, and MongoDB queries for automation, analysis, and troubleshooting
- Support 24/7 operations by proactively monitoring and maintaining critical live services, platforms, and gateways
- Conduct functional testing and continuous monitoring to ensure early issue detection, high availability, and reliable system performance
- Manage incident acknowledgment, resolution, and escalation in line with SLAs, while preparing accurate performance reports and maintaining multi-channel daily reporting systems
